## 230VAC Powered Water Detection Module alarm Type MPW

The unit has been designed to be mains powered and give an audible warning when it detects the presence of water or any conductive liquid. Applications for the unit include washing machines, small water tanks, drip trays, sump tanks or high/low level detection, to detect leaks along pipe runs or under.

The device on request can also contain a small onward signalling relay to building management systems or existing alarm systems.

### Standard Signal And Water Detection cable sizes

You will need to specify what lengths of detection cable you require with the MPW water alarm, standard sizes are as follows but if you need different lengths please advise us as we can make any lengths up to a maximum of 100 metres of signal (white cable) and 10 metres of detection cable.

#### **Product**

<b>Code</b>	<b>Description</b>
DC2	3 metres of signal cable and 2 metres of water detection cable
DC5	3 metres of signal cable and 5 metres of water detection cable
DC10	3 metres of signal cable and 10 metres of water detection cable

#### **Specification**

Size	105mm long x 60mm wide x 28mm deep
Voltage	230VAC
Alarm Noise	80dB
Optional Relay	30VAC/DC 1 amp changeover contacts
